

Bull Moose Tube Locations

As a result of continuous growth for over three decades, Bull Moose Tube Company has become one of the largest and most dominant tubing manufacturers in North America. BMT currently operates 19 tubing mills at 7 locations. Our regional manufacturing concept makes us closer to you, providing better service and value through a greater choice of rollings, more efficient delivery costs, and strong technical support.

- Chesterfield, MO:** Our modern corporate offices since 1988. This facility with state-of-the-art data processing systems houses over 50 dedicated staff, sales and support personnel.
- Gerald, MO:** BMT's first plant, opened in 1964, has been modernized to produce hot rolled, pickled and oiled, cold rolled and coated mechanical tube, along with *Eddy Pipe* brand sprinkler pipe.
- Chicago Heights, IL:** Acquired in 1982, this factory sits at the center of U.S. transportation, producing hot rolled, pickled and oiled, cold rolled and coated mechanical tube.
- Trenton, GA:** Built in 1984, our southeastern facility is equally close to Atlanta, Birmingham, Nashville, and Knoxville. Products include *Eddy Pipe* brand sprinkler pipe, structural and mechanical tube.
- Elkhart, IN:** Acquired in 1990, this quarter-mile-long plant with over 400,000 square feet of manufacturing space produces structural tubing and contains an indoor rail siding for railcar loads.
- Masury, OH:** Acquired by BMT in 1997, this factory produces hot rolled, pickled and oiled, and coated mechanical tube, in addition to *Eddy Pipe* brand sprinkler pipe.
- Casa Grande, AZ:** This facility was added in 2004 to complete the vision of nationwide regional distribution of structural tubing and sprinkler pipe. With 125,000 square feet of manufacturing space, this facility will fulfill all of the needs of current a future customers on the West Coast.
- Burlington, ON: (Canada)** Since 1989, this extensively modernized plant has provided mechanical and structural tubing for Canadian and Northern U.S. customers.
