BIGGER STEEL
FOR BIGGER JOBS

JUMBO HSS FROM BULL MOOSE

BULL MOOSE can now provide customers with jumbo HSS up to 22″ square and rectangles as large as 24″ x 12″. The expanded size range, resulting from the strategic partnership with Mitsui & Co. (U.S.A.), Inc., MM&KENZAI Corporation, and Nippon Steel Metal Products Co., Ltd., complements BMT's current production capabilities of up to 14″ square x 0.75″ wall and rectangular equivalents.

Common applications include large, long span warehouses and distribution centers, airports, stadiums, parking garages, and innovative structures which require high strength/low weight HSS support for heavy loads.

Nippon Steel Metal Products - A500 Size Range

SQUARES — BMT U.S. Exclusives

Size	Wall Thickness (inches)					Weight Per Foot (lbs)
