

WEATHERING GRADE STEEL TUBE FROM BULL MOOSE: THE LOW-COST, MAINTENANCE-FREE ALTERNATIVE FOR OUTDOOR APPLICATIONS.

With the rising cost of galvanized steel, it's good to know there's a solid substitute: **Weathering Grade steel tube** from Bull Moose.

Compare this stock to COR-TEN® and other ASTM A847 options, and you'll find that our Weathering Grade steel delivers equivalent performance for heavy-weather environments...cost-effectively.

Over time, the surface of this alloy steel develops a stable, light-brown patina that protects it from corrosion—and eliminates the need for painting and re-painting. Its durability and 50ksi strength make it ideal for applications such as walkways, bridges, railings, and other structures that are directly exposed to the elements.

The steel's weathered finish provides a natural look, and because it's permanent, it doesn't require VOC paint or blasting—both of which can harm the environment.

COR-TEN is a registered trademark of U.S. Steel.

HSS WITH WEATHERING STEEL

- Produced per ASTM A847 (which mirrors ASTM A500 plus atmospheric-corrosion-resistant steel).
- 50ksi min. yield
- 70ksi min. tensile
- 19% min. elongation.
- General application: bridges, utility/light poles, walkways.
- Stock sizes:
 - 3/16"
 - 1/4"
 - 3/8"(Custom sizes: inquire on lead time)
- Lifetime savings...thanks to:
 - NO sand blasting
 - NO painting
 - NO maintenance

LEADING THE HERD

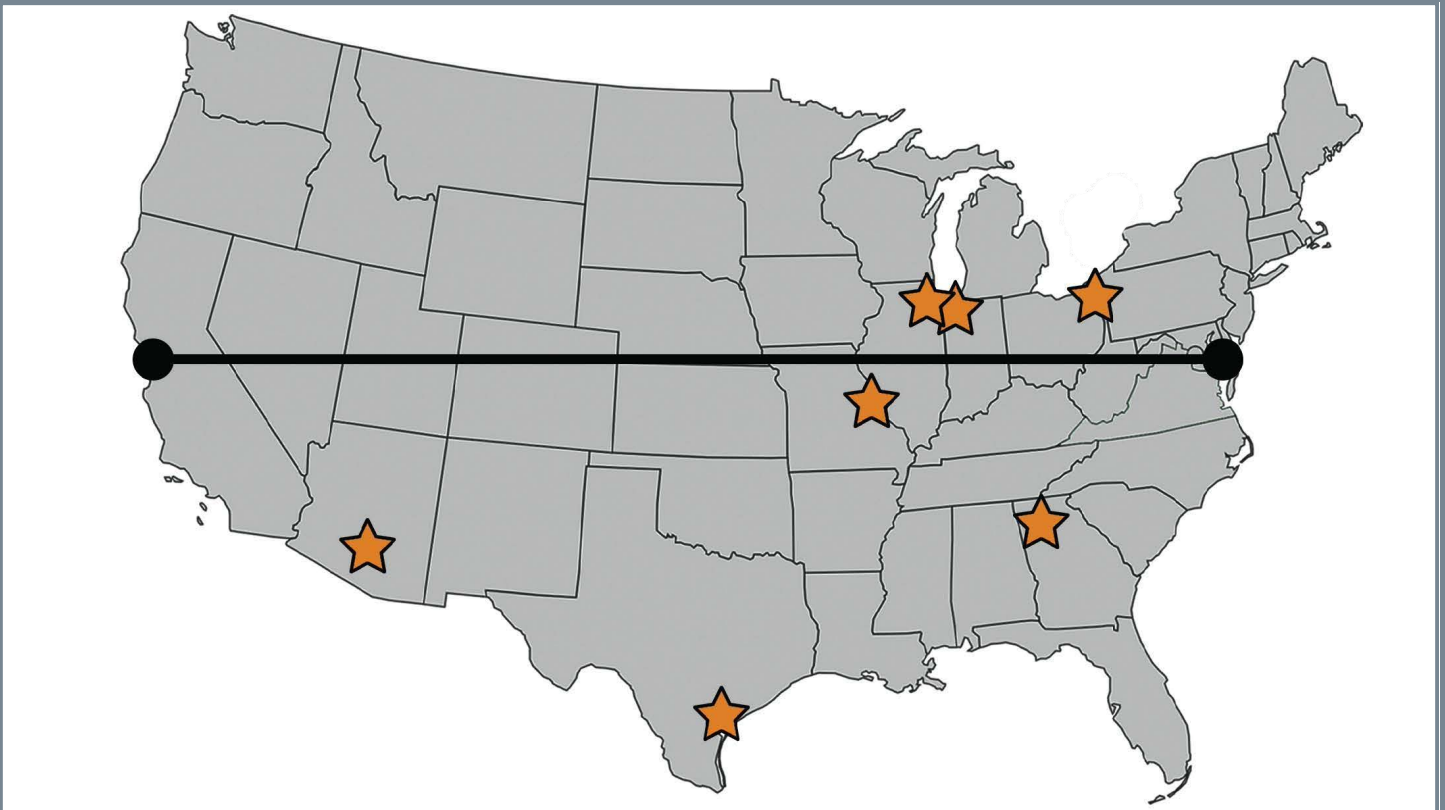

Founded in 1962, Bull Moose tube has been delivering products of enduring quality for more than half a century.

Our mechanical steel tubing is used across an impressive variety of applications, and we have one of the broadest ranges of sprinkler pipe in the industry. For projects requiring heavy-duty HSS tube, Bull Moose provides squares up to 14", and rounds up to 18" OD, featuring wall thicknesses extending from 3/16" to 3/4".

With eight North American manufacturing and warehouse facilities, Bull Moose has the products you need, when you need them.

For products of exceptional strength and reliability, count on Bull Moose Tube.
