

BIGGER STEEL FOR BIGGER JOBS

JUMBO SIZES FROM BULL MOOSE

BULL MOOSE can now provide customers with jumbo sizes up to 22" square and rectangles as large as 24" x 12". The expanded size range, resulting from the strategic partnership with Mitsui & Co. (U.S.A.), Inc., MM&KENZAI Corporation, and Nippon Steel Metal Products Co., Ltd., complements BMT's current production capabilities of up to 14" square x 0.75" wall and rectangular equivalents.

Common applications include large, long span warehouses and distribution centers, airports, stadiums, parking garages, and innovative structures which require high strength/low weight HSS support for heavy loads.
